<p>Caseload Management Report Clinic Module/Reports/Caseload Management</p> <p>Caseload Year (Current Yr & Previous Yr) is based on the Federal Fiscal year which is October 1 – September 30.</p> <p>Curr Year P/E Ratio (last 12 months) provides a comparison of participants with benefits (participation) to the total enrolled for that month or 12-month average.</p> <p>% Closeout Participation to Base Caseload displays the % of participants with benefits compared to the agency's assigned caseload. (% Closeout = # of participants with benefits that month ÷ assigned caseload #)</p> <p>Closeout Participation is your agency's achieved caseload for the month (# of participants with benefits that month). This number is 2 months behind due to the rolling benefit dates. The closeout month is always 2 months from the issue month. For instance, the closeout participation for September is displayed in November.</p> <p>Enrollment refers to the number of participants with an active certification that month. These participants may or may not have benefits issued that month. Any participant with an active certification period is considered enrolled.
